

THE MIGHTY GOD

By Evie Shepherd

God had a plan and that was to build us. It is great to be part of God's plan. God spented years and years trying to build us. Do you see that now we are alive and every time on our birthday from the time that we was born, we've grown. Every day we grow bigger and bigger. When we're growing we've grown things on our bodies like our eyes, our nose and mouth and even our ears. As well, like I said, even our hair.

And did you know that God is always watching us? It's just like magic. It's like he's got eyes all over his body. Every time that we want to turn or move or spin or dance God made us turn around and He made legs for us to walk with.

We're all very special. Even like you and other people, but not me, think that you're the best and you're the best but actually everyone's the best. There's no best: everyone's the same goodness for everyone. It should be that for everyone. But everyone believes themselves is the best. But I know that everyone is the best.

God thinks we're like a prize or a trophy. God thinks that we're something really, really good. Even though we're all different, like we've got different coloured hairs and different topics that we like, we're all still the same.

God is always kind to us even when we're sleeping, even when we're awake. When we have bad dreams when we haven't got a worry doll, God takes away the bad dreams. Well done God.
